## Confirmation of Landing Training after initial skill test on simulator

### AMC FCL 1.261

#### Guidelines for Approval of an Aeroplane Type Rating Course

#### 11. Aeroplane Training with Flight Simulator

11.1 With the exception of courses approved for Zero Flight Time Training, certain training exercises normally involving take-off and landing in various configurations will need to be completed in the aeroplane rather than an approved Flight Simulator. For multi-pilot aeroplanes where the student pilot has more than 500 hours MPA experience in aeroplanes of similar size and performance, these should include at least 4 landings of which at least one should be a full stop landing. In all other cases the student should complete at least 6 landings.

With the agreement of the approving Authority, this aeroplane training, provided it does not exceed 2 hours of the flight training course, may be completed after the student pilot has completed the STD training and has successfully undertaken the type rating skill test.

#### Course completion certificate

14. The Head of Training, or a nominated representative, is required to certify that all training has been carried out before an applicant undertakes a skill test for the type rating to be included in the pilot's licence. **It is not uncommon for an approved TRTO to be unable to provide, or have direct supervision over any training that is required to be carried out on an aeroplane conducted by a third party such as the operator.** In such cases, and with the agreement of the approving Authority, a TRTO Course Completion Certificate may be issued confirming completion of ground and STD flight training. Confirmation of the completion of aeroplane training should then be provided by the organisation undertaking this training, as a requirement for issue of the type rating.

The period of time between any two phases of training should not exceed 60 days otherwise refresher training at the discretion of the Authority will be required.
