A 3/14. SEASONAL SNOW PLAN

Snowfall in Greece on a yearly basis is generally limited or not existent.

Snow removal services and equipment are available only at Northern Greek airports (LGTS, LGAL, LGKV, LGKA, LGKZ, LGIO) after cooperation agreements with the private sector.

Snowfall is extremely limited or not existent at the rest of Greek airports, where snow removal will be undertaken by local authorities in coordination with airport authority.

The airport authority will be responsible for reporting the movement area prevailing conditions and disseminating information to ATS units.

Information on the minimum critical snow bank will be reported whenever a SNOWTAM is issued.

Aeronautical Information Service (AIS) Division, NOTAM Publication Section, will issue all SNOWTAMs for Greek airports.

The two addresses shown below are used for the dissemination of SNOWTAMs.

→ LGZZSNOI address collective for distribution for foreign countries.

LGZZSNON address collective for distribution for Greece.

Request concerning amendments to the distribution list, should be forwarded via AFTN to Aeronautical Information Service (AIS) Division, NOTAM Publication Section (AFTN address LGGGYNYP).

Foreign SNOWTAMs destined for Greece will be forwarded to the address LGZZSNOW.

NOTE: AIC A8/99 CANCELLED.
